Vision and Mission Statement

VISION:

In cooperation with the maritime industry and educational partners, Maritime Academy Charter School endeavors to enable each cadet to become capable and respectful members of society, ready for post-secondary education or gainful employment in either the private or public sector upon graduation.

MISSION:

- Maritime Academy Charter School strives to instill in each cadet an appreciation of our nation’s maritime heritage via hands-on access to the global transportation industry, particularly as it relates to the Ports of the Delaware River and Bay.

- Maritime Academy Charter School expects all 1-12 cadets to master their respective standards-based curricula for graduation, post-secondary education and career opportunities.

- Maritime Academy Charter School provides a nurturing school environment that develops a strong sense of community, individual self-confidence and the recognition of the strength of differences across people and all cultures.
